

WPA Handicap System

As long as you know how to work the program Excel or a spreadsheet you can do this very easily.

This is the way I learned how to figure the handicap for the WPA Projects.

Members need to have three (3) scores to compete for the championship.

1 You take the last three (3) scores the member has played in but not this project.

On new members you will have to figure their score in this project if it is their 3 project golfing

2 This gives you a total and you divide this by three (3).

3 Subtract Seventy two (72) from that total.

4 Multiply that total by four (4).

5 Divide the total by five (5).

6 Now round this off and that will give you their handicap

7 After the round subtract their handicap from their score and you will have their net score

Don't ask me who figured out this I just followed Murray Taylor's method

I do this because I don't know of another system that works as well as this one does but it does.

Chuck Genovese

I agree with Chuck - *Mike K Carlson*
